

NUCLear Exotic structures And Related phenomena (NUCLEAR2025)

Wednesday 24 September 2025

Lectures: Afternoon section on 9/24 - X1-5-B5009 - HIRG conference room (13:30 - 14:30)

-Conveners: Yuhu Zhang

time	[id] title	presenter
13:30	[73] Imaging nuclei by smashing them: How are their shapes revealed despite destruction	JIA, Jiangyong
14:00	[74] Light and heavy ions as probe of nuclear structure with ATLAS	HU, Qipeng

Lectures: Afternoon section on 9/24 - X1-5-B5009 - HIRG conference room (15:00 - 16:30)

-Conveners: Jiangyong Jia

time	[id] title	presenter
15:00	[76] Application of forbidden-state-free locally peaked Gaussians: Possible halo structure in neutron-rich Ca isotopes	HORIUCHI, Wataru
15:30	[77] Measurement of the reaction rate on Fe59(n,g)	JIN, Shilun
16:00	[78] Theoretical studies of isospin symmetry breaking in exotic nuclei	LI, Jianguo
